

NORWAY - PHILIPPINES LNG SUMMIT 2024

11 NOVEMBER IN MANILA

Norwegian Embassy
Manila

REPUBLIC OF THE PHILIPPINES
PHILIPPINE NATIONAL OIL COMPANY
THE ENERGY COMPANY

Norwegian
Energy Partners

Philippines Norway
Business Council

The Norwegian Embassy in Manila together with Philippine National Oil Company (PNOC), Norwegian Energy Partners (NORWEP) and Philippines Norway Business Council (PNBC) will organize **The Norway - Philippines LNG Summit** in Manila **11 November 2024**.

The Norway-Philippines LNG Summit will bring together industry leaders, policymakers, and experts from the two countries.

A range of topics will be covered, including the current and future role of LNG for the electric power industry in the Philippines and the role of LNG as a transitional energy source. We will also explore large-scale and small-scale LNG projects, as well as Norwegian LNG technology, solutions, and services.

In addition to presentation, discussions and market opportunities, The Norway-Philippines LNG Summit offers an excellent opportunity for profiling, networking and B2B meetings for participating Norwegian companies.

We would like to **invite your company** to participate with **delegates** and (if of interest) to submit suggested topics **for a presentation** that one of your representatives potentially could hold during the summit (subject to relevance and availability).

For companies wanting additional visibility and profiling a **sponsor package** is available for **25,000 NOK**. This includes: Priority speaking opportunity, logos on printed and electronic materials, pull-up banner set-up, information table, corporate video screening during breaks

Please let us know if this conference is of interest to you and your company and we can have further discussion through email or set up a meeting online.

Please contact us for more information
